NAEOS CLI Reference

Version 3.7.1

NAEOS Foundation

2026-10-31

NAEOS provides a complete CLI with commands for every stage of the engineering pipeline.

Core Commands

Command	Description
`naeos run`	Execute the full pipeline
`naeos validate`	Validate a specification using the NAEOS pipeline
`naeos ai compile`	Compile a spec into AI instruction sets
`naeos context`	Generate AI context bundles from specifications
`naeos test`	Run tests for generated code
`naeos docgen`	Generate documentation from specification

Project & Spec Commands

Command	Description
`naeos init`	Initialize a new NAEOS project or generate config
`naeos create`	Interactive project creation wizard
`naeos scaffold`	Generate a starter project scaffold
`naeos import`	Import specifications from HCL format to NAEOS YAML/JSON
`naeos export`	Export generated artifacts to a directory
`naeos audit`	Security audit of generated or source files
`naeos diff`	Compare generated artifacts with existing output directory
`naeos repair`	Repair the NAEOS output directory
`naeos lint`	Lint a specification file
`naeos inspect`	Inspect the NAEOS pipeline result
`naeos preview`	Preview generated artifacts without writing them
`naeos distributed`	Run pipeline tasks in distributed mode across multiple workers

Build, Deploy & CI/CD

Command	Description
`naeos build`	Build artifacts from a specification
`naeos cicd`	Generate CI/CD pipeline configuration
`naeos cloud`	Cloud deployment commands

Command	Description
`naeos deploy`	Deploy the pipeline output to a target environment
`naeos gateway`	API gateway management
`naeos graphql`	Start GraphQL API server
`naeos helm`	Helm chart scaffolding and validation
`naeos airgap`	Create, inspect, and import air-gapped distribution bundles

Management Commands

Command	Description
`naeos mcp`	Start MCP (Model Context Protocol) server
`naeos marketplace`	Browse and install templates, profiles, and plugins
`naeos profile`	Manage industry-specific project profiles
`naeos plugin`	Manage NAEOS plugins
`naeos template`	Manage generation templates, prompt library, and template marketplace
`naeos workspace`	Manage multi-module workspaces
`naeos artifacts`	Manage generated project artifacts
`naeos migrate`	Manage spec schema migrations
`naeos migration`	Database migration management
`naeos rollback`	Rollback to a previous snapshot of generated artifacts
`naeos lock`	Manage lock files for reproducible builds

Monitoring & Operations

Command	Description
`naeos status`	Show current pipeline, system and project status
`naeos doctor`	Run diagnostics on the NAEOS environment and configuration
`naeos watch`	Watch for specification changes and re-run the pipeline
`naeos kernel`	Inspect the NAEOS kernel and service registry
`naeos dashboard`	Start NAEOS web dashboard
`naeos api`	Start NAEOS REST API server
`naeos health`	Run system health checks and diagnostics
`naeos monitor`	Start monitoring server with Prometheus metrics
`naeos observability`	Observability and telemetry management
`naeos events`	Event sourcing commands for pipeline audit trail and replay
`naeos history`	Show pipeline run history from persisted events
`naeos serve`	Run NAEOS as a production daemon (HTTP/TLS, systemd)

Security & Compliance

Command	Description
`naeos auth`	Authentication and authorization management
`naeos security`	Security and secrets management
`naeos compliance`	Compliance reporting and audit log export
`naeos config`	Configuration management and resolution (env/file/K8s secret/Vault)

Command	Description
`naeos policy`	Manage governance policies
`naeos control`	Governance control plane evaluation
`naeos evidence`	Immutable evidence store — governance audit trail
`naeos verify`	Independently verify governance evidence
`naeos runtime`	Runtime gateway for authorized agent execution
`naeos sign`	Sign and verify artifacts (Ed25519)
`naeos sbom`	Software Bill of Materials generation and verification

Data & Integration

Command	Description
`naeos db`	Database connection and migration management
`naeos broker`	Message broker management
`naeos ws`	Start WebSocket server for real-time updates
`naeos lsp`	Start NEIR Language Server Protocol server
`naeos supabase`	Supabase backend management

Developer Experience & Utility

Command	Description
`naeos ai`	AI-powered assistance commands
`naeos dx`	Developer experience tools
`naeos tui`	Terminal user interface tools
`naeos schema`	NEIR schema registry operations
`naeos search`	Full-text search engine management
`naeos perf`	Performance optimization tools
`naeos benchmark`	Run pipeline benchmarks
`naeos docs`	Generate project documentation
`naeos completion`	Generate shell completion scripts
`naeos version`	Show NAEOS version

For detailed usage of each command, run `naeos <command> --help`.
