

NAEOS CLI Reference

Version 3.4.0

NAEOS Foundation

2026-09-09

NAEOS provides a complete CLI with commands for every stage of the engineering pipeline.

Core Commands

Command	Description
<code>naeos run</code>	Execute the full pipeline
<code>naeos validate</code>	Validate a specification using the NAEOS pipeline
<code>naeos ai compile</code>	Compile a spec into AI instruction sets
<code>naeos context</code>	Generate AI context bundles from specifications
<code>naeos test</code>	Run tests for generated code
<code>naeos docgen</code>	Generate documentation from specification

Project & Spec Commands

Command	Description
<code>naeos init</code>	Initialize a new NAEOS project or generate config
<code>naeos create</code>	Interactive project creation wizard
<code>naeos scaffold</code>	Generate a starter project scaffold
<code>naeos import</code>	Import specifications from HCL format to NAEOS YAML/JSON
<code>naeos export</code>	Export generated artifacts to a directory
<code>naeos audit</code>	Security audit of generated or source files
<code>naeos diff</code>	Compare generated artifacts with existing output directory
<code>naeos repair</code>	Repair the NAEOS output directory
<code>naeos lint</code>	Lint a specification file
<code>naeos inspect</code>	Inspect the NAEOS pipeline result
<code>naeos preview</code>	Preview generated artifacts without writing them
<code>naeos distributed</code>	Run pipeline tasks in distributed mode across multiple workers

Build, Deploy & CI/CD

Command	Description
<code>naeos build</code>	Build artifacts from a specification
<code>naeos cicd</code>	Generate CI/CD pipeline configuration
<code>naeos cloud</code>	Cloud deployment commands

Command	Description
<code>naeos deploy</code>	Deploy the pipeline output to a target environment
<code>naeos gateway</code>	API gateway management
<code>naeos graphql</code>	Start GraphQL API server
<code>naeos helm</code>	Helm chart scaffolding and validation
<code>naeos airgap</code>	Create, inspect, and import air-gapped distribution bundles

Management Commands

Command	Description
<code>naeos mcp</code>	Start MCP (Model Context Protocol) server
<code>naeos marketplace</code>	Browse and install templates, profiles, and plugins
<code>naeos profile</code>	Manage industry-specific project profiles
<code>naeos plugin</code>	Manage NAEOS plugins
<code>naeos template</code>	Manage generation templates, prompt library, and template marketplace
<code>naeos workspace</code>	Manage multi-module workspaces
<code>naeos artifacts</code>	Manage generated project artifacts
<code>naeos migrate</code>	Manage spec schema migrations
<code>naeos migration</code>	Database migration management
<code>naeos rollback</code>	Rollback to a previous snapshot of generated artifacts
<code>naeos lock</code>	Manage lock files for reproducible builds

Monitoring & Operations

Command	Description
<code>naeos status</code>	Show current pipeline, system and project status
<code>naeos doctor</code>	Run diagnostics on the NAEOS environment and configuration
<code>naeos watch</code>	Watch for specification changes and re-run the pipeline
<code>naeos kernel</code>	Inspect the NAEOS kernel and service registry
<code>naeos dashboard</code>	Start NAEOS web dashboard
<code>naeos api</code>	Start NAEOS REST API server
<code>naeos health</code>	Run system health checks and diagnostics
<code>naeos monitor</code>	Start monitoring server with Prometheus metrics
<code>naeos observability</code>	Observability and telemetry management
<code>naeos events</code>	Event sourcing commands for pipeline audit trail and replay
<code>naeos history</code>	Show pipeline run history from persisted events
<code>naeos serve</code>	Run NAEOS as a production daemon (HTTP/TLS, systemd)

Security & Compliance

Command	Description
<code>naeos auth</code>	Authentication and authorization management
<code>naeos security</code>	Security and secrets management
<code>naeos compliance</code>	Compliance reporting and audit log export
<code>naeos config</code>	Configuration management and resolution (env/file/K8s secret/Vault)

Command	Description
<code>naeos policy</code>	Manage governance policies
<code>naeos control</code>	Governance control plane evaluation
<code>naeos evidence</code>	Immutable evidence store — governance audit trail
<code>naeos verify</code>	Independently verify governance evidence
<code>naeos runtime</code>	Runtime gateway for authorized agent execution
<code>naeos sign</code>	Sign and verify artifacts (Ed25519)
<code>naeos sbom</code>	Software Bill of Materials generation and verification

Data & Integration

Command	Description
<code>naeos db</code>	Database connection and migration management
<code>naeos broker</code>	Message broker management
<code>naeos ws</code>	Start WebSocket server for real-time updates
<code>naeos lsp</code>	Start NEIR Language Server Protocol server
<code>naeos supabase</code>	Supabase backend management

Developer Experience & Utility

Command	Description
<code>naeos ai</code>	AI-powered assistance commands
<code>naeos dx</code>	Developer experience tools
<code>naeos tui</code>	Terminal user interface tools
<code>naeos schema</code>	NEIR schema registry operations
<code>naeos search</code>	Full-text search engine management
<code>naeos perf</code>	Performance optimization tools
<code>naeos benchmark</code>	Run pipeline benchmarks
<code>naeos docs</code>	Generate project documentation
<code>naeos completion</code>	Generate shell completion scripts
<code>naeos version</code>	Show NAEOS version

For detailed usage of each command, run `naeos <command> --help`.
